WORK HISTORY

Front End Engineer
ReCharge Payments | January 2019 - March 2020

- Designed and delivered all-new "batteries included" customer portal theme as a SPA written with VueJS, Vue Router, and Vuex.
- Converted legacy UI components from vanilla JS/jQuery to VueJS.
- Developed and maintained UI components following Agile/SCRUM methodologies.
- Developed back-end features and enhancements in Python (Flask).

Front End Engineer
Digital Assets Data | July 2018 - December 2018

- Developed cryptocurrency analytics and reporting dashboard for institutional investors and researchers.
- Wrote and tested React components.
- Developed GraphQL API endpoints and integrations.
- Developed back-end services and endpoints in Python (Django).

Web Development Engineer
T-Mobile (FKA Layer3TV) | April 2016 - July 2018

- Converted legacy UI components from jQuery/AngularJS to VueJS
- Designed and deployed iPad-optimized SPA with VueJS, Vuex, and Vue Router for use in T-Mobile retail stores.
- Developed payment delinquency tracking and notification system using NodeJS, Express, and MongoDB.

EDUCATION

Galvanize
Web Development Intensive 2015-2016

- Graduated with certificate.
- Received strong recommendations from instructors and staff.
